

## Application Integration Engineer

[Apply Now](#)

Company: SSC Egypt

Location: Cairo

Category: computer-and-mathematical

- 1- End-to-end implementation of the integration workstream from the requirement gathering and data mapping to production delivery.
- 2- Help define the integration and data flow architecture and evaluate providers' web services and API capabilities. Identify gaps in available integration services and work on remediation strategies to ensure stability as the underlying platform technologies continue to evolve.
- 3- Create a best-in-class, complete, and managed external-facing API layer to be used for business-partner integration, to support external clients and third-party applications and services.
- 4- Contribute to the development of an external-facing API layer for business partner integration, e.g. mobile apps, POSs, third-party applications, and services.
- 5- Help assess future API management tools, examining capabilities against requirements and performing validation activities as required.
- 6- Support teams to resolve production incidents and proactively seek opportunities to develop preventative measures to avoid recurrence.

7- Ensure technical standards and architectural best practices are maintained and optimize system integration performance.

8- Utilize middleware technologies and integration platforms to facilitate data flow and communication

## Requirements

Bachelor's degree in computer science, Information Technology, or equivalent

Experience in successfully delivering high-performing application solutions that meet scope, cost, and date parameters. (For Seniority Level and above)

Broad knowledge of enterprise-level, commercially available hardware and software products, operating systems, networking systems, and methodologies and tools for integrating web-based products

Expertise in comparing integration approaches and assessing their relative strengths and limitations in terms of meeting business goals. (For Seniority Level and above)

Well-educated regarding Integrations in several technologies and languages such as Java, .Net, Oracle SQL, SQL Server, XML, JSON, WebLogic, Postman, SoapUI, Network basics as well as scripting in Linux

Experience with middleware technologies and message queuing systems

highly motivated with very strong interpersonal skills, oral and written communication skills, and the ability to work effectively independently or as part of a team

Customer-facing and strong teamwork skills
